*1. The American College Health Association has published guidelines on tuberculosis screening of college and university students. These guidelines are based on recommendations from the Centers for Disease Control and the American Thoracic Society. For more information, visit www.acha.org or refer to the CDC's Core Curriculum on Tuberculosis available at state health departments or at the following website: www.cdc.gov/nchstp/th/pubs/corecurr/.

2. Categories of high-risk students include those students who have arrived within the past five years from countries where TB is endemic. It is easier to identify countries of low, rather than high, TB prevalence. Therefore, students should undergo TB screening if they have arrived from countries EXCEPT those on the following list: Canada, Jamaica, Saint Kitts and Nevis, Saint Lucia, US Virgin Islands (USA), Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Malta, Monaco, Netherlands, Norway, San Marino, Sweden, Switzerland, United Kingdom, American Samoa, Australia, or New Zealand. Other categories of high-risk students include those with HIV infection, who inject drugs, who have resided in, volunteered in, or worked in high-risk congregate settings such as, prisons, nursing homes, hospitals, residential facilities for patients with AIDS, or homeless shelters; and those who have clinical conditions such as diabetes, chronic renal failure, leukemias or lymphomas, low body weight, gastrectomy and jejunioleal by-pass, chronic malabsorption syndromes, prolonged corticosteroid therapy (e.g. prednisone > 15 mg/d for > one month) or other immune-suppressive disorders.
